

## **An interesting part of your country**

### **Describe an interesting part of your country.**

You should say:

where it is

how you know about it

.....

and explain why you think it is interesting.

### **Part 3**

#### Notes

- If the wording is, a "part of your country" instead of, "a place in your country" then you could use general words such as, "the north-east part" or "the far-western part" without actually giving any names. But including a name or two along with naming the part would be better.
- "Interesting" means "interesting to you". It might not be especially interesting to other people.
- "Interesting" means it stimulates your mind, your thinking, not necessarily your feelings. For example, there might be something that you think is unique about this place, or something you would like to learn more about this place. It does not necessarily have to be "attractive", or other adjectives that refer to feelings.
- The missing clue might be: "what you know about this place", "whether or not you have visited this place" or, "how well-known this

place is" . . . You can include a few words about all of those points.

### **Part 3**

#### **Your Country**

- What are the differences between the northern and southern (or, eastern and western) parts of your country?

#### **Living in Cities**

- What do you think are the main differences between living in a city and living in the countryside (in a village or small town)?

#### **Countries of the World**

- What sorts of things make one country different to another country (or, different to other countries)?
